Manolis

Congratulations and every wish for every success to Hellenic Association of Forensic Pathology. Finally Greece found the best voice in European Forensic Community. Greece from completely absent all years past (unless Crete in the last 10 years) now has a leading position. That's a lot of good news all at once!!

I am in New Zealand at the moment and will write again on my return in a few weeks.

If it would be helpful to your training program then I can find some monies to enable the trainees to spend a short time in Dundee so that they can gain experience of another country.

Kind regards

Prof. Derrick Pounder
