Emanuel Michalodimitrakis, MD

Dear Manny:

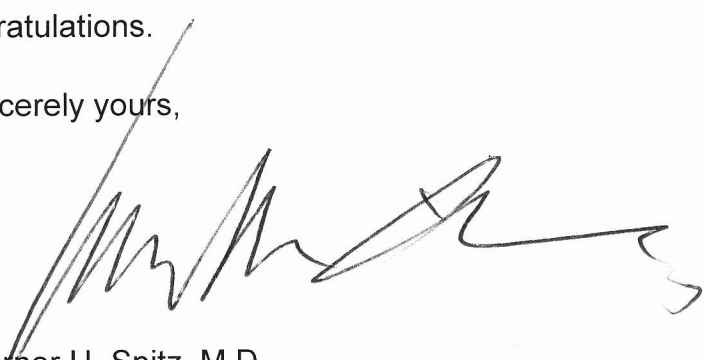

I read with great pleasure and pride, your election to the Presidency of the Hellenic Association of Forensic Pathology. As president, and the only national forensic pathologist having jurisdiction over all Greece, you will have the opportunity of teaching forensic experts throughout the country by establishing a program of continuing education at the Department of Forensic Pathology at the University of Crete at Heraklion.

This will not only elevate the standard of forensic pathology in your native land, but also provide support for the administration of justice in Greece.

You are undoubtedly eminently qualified for this position. To my knowledge, no one in Greece has your qualifications, experience and the will power to carry out this very important responsibility.

Please accept my congratulations.

Sincerely yours,

Werner U. Spitz, M.D.
Professor of Pathology
Wayne State University, School of Medicine
Detroit, Michigan
